

CLOGGED TOILETS & DRAINS

Troubleshooting Maintenance

REMINDER:

It is the residents' responsibility to do everything they can to prevent foreign objects (including hair) from going down the drains. Residents must be aware of what they are putting in or down all plumbing lines on the property.

If it is determined that a plumbing repair is due to resident negligence, the bill for repair is a resident charge.

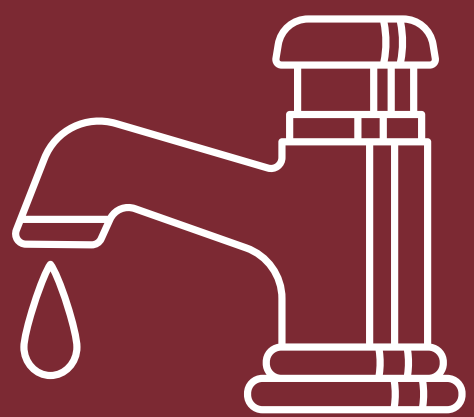

FOOD & GREASE

Food and grease should never go down the drain. If your unit is equipped with a kitchen sink disposal, make sure you are following all the recommendations: use running water whenever disposal is in use, avoid fibrous and starchy foods, familiarize yourself with the reset button (typically located on the bottom of the unit).

TOILETS & PLUMBING

Be aware of flushing wipes of any type - even ones labeled as "flushable". Feminine hygiene products, paper towels, and napkins cannot be flushed down any toilets or plumbing.

CALL US!

If the clog persists, please submit a maintenance ticket through your online portal or call our office at 540.478.4974, ext. 2.
